

BALM TATTOO[®]

**A PROFESSIONAL RANGE OF COSMETIC PRODUCTS
FOR TATTOO ARTISTS, TATTOO STUDIOS
AND TATTOO LOVERS.**

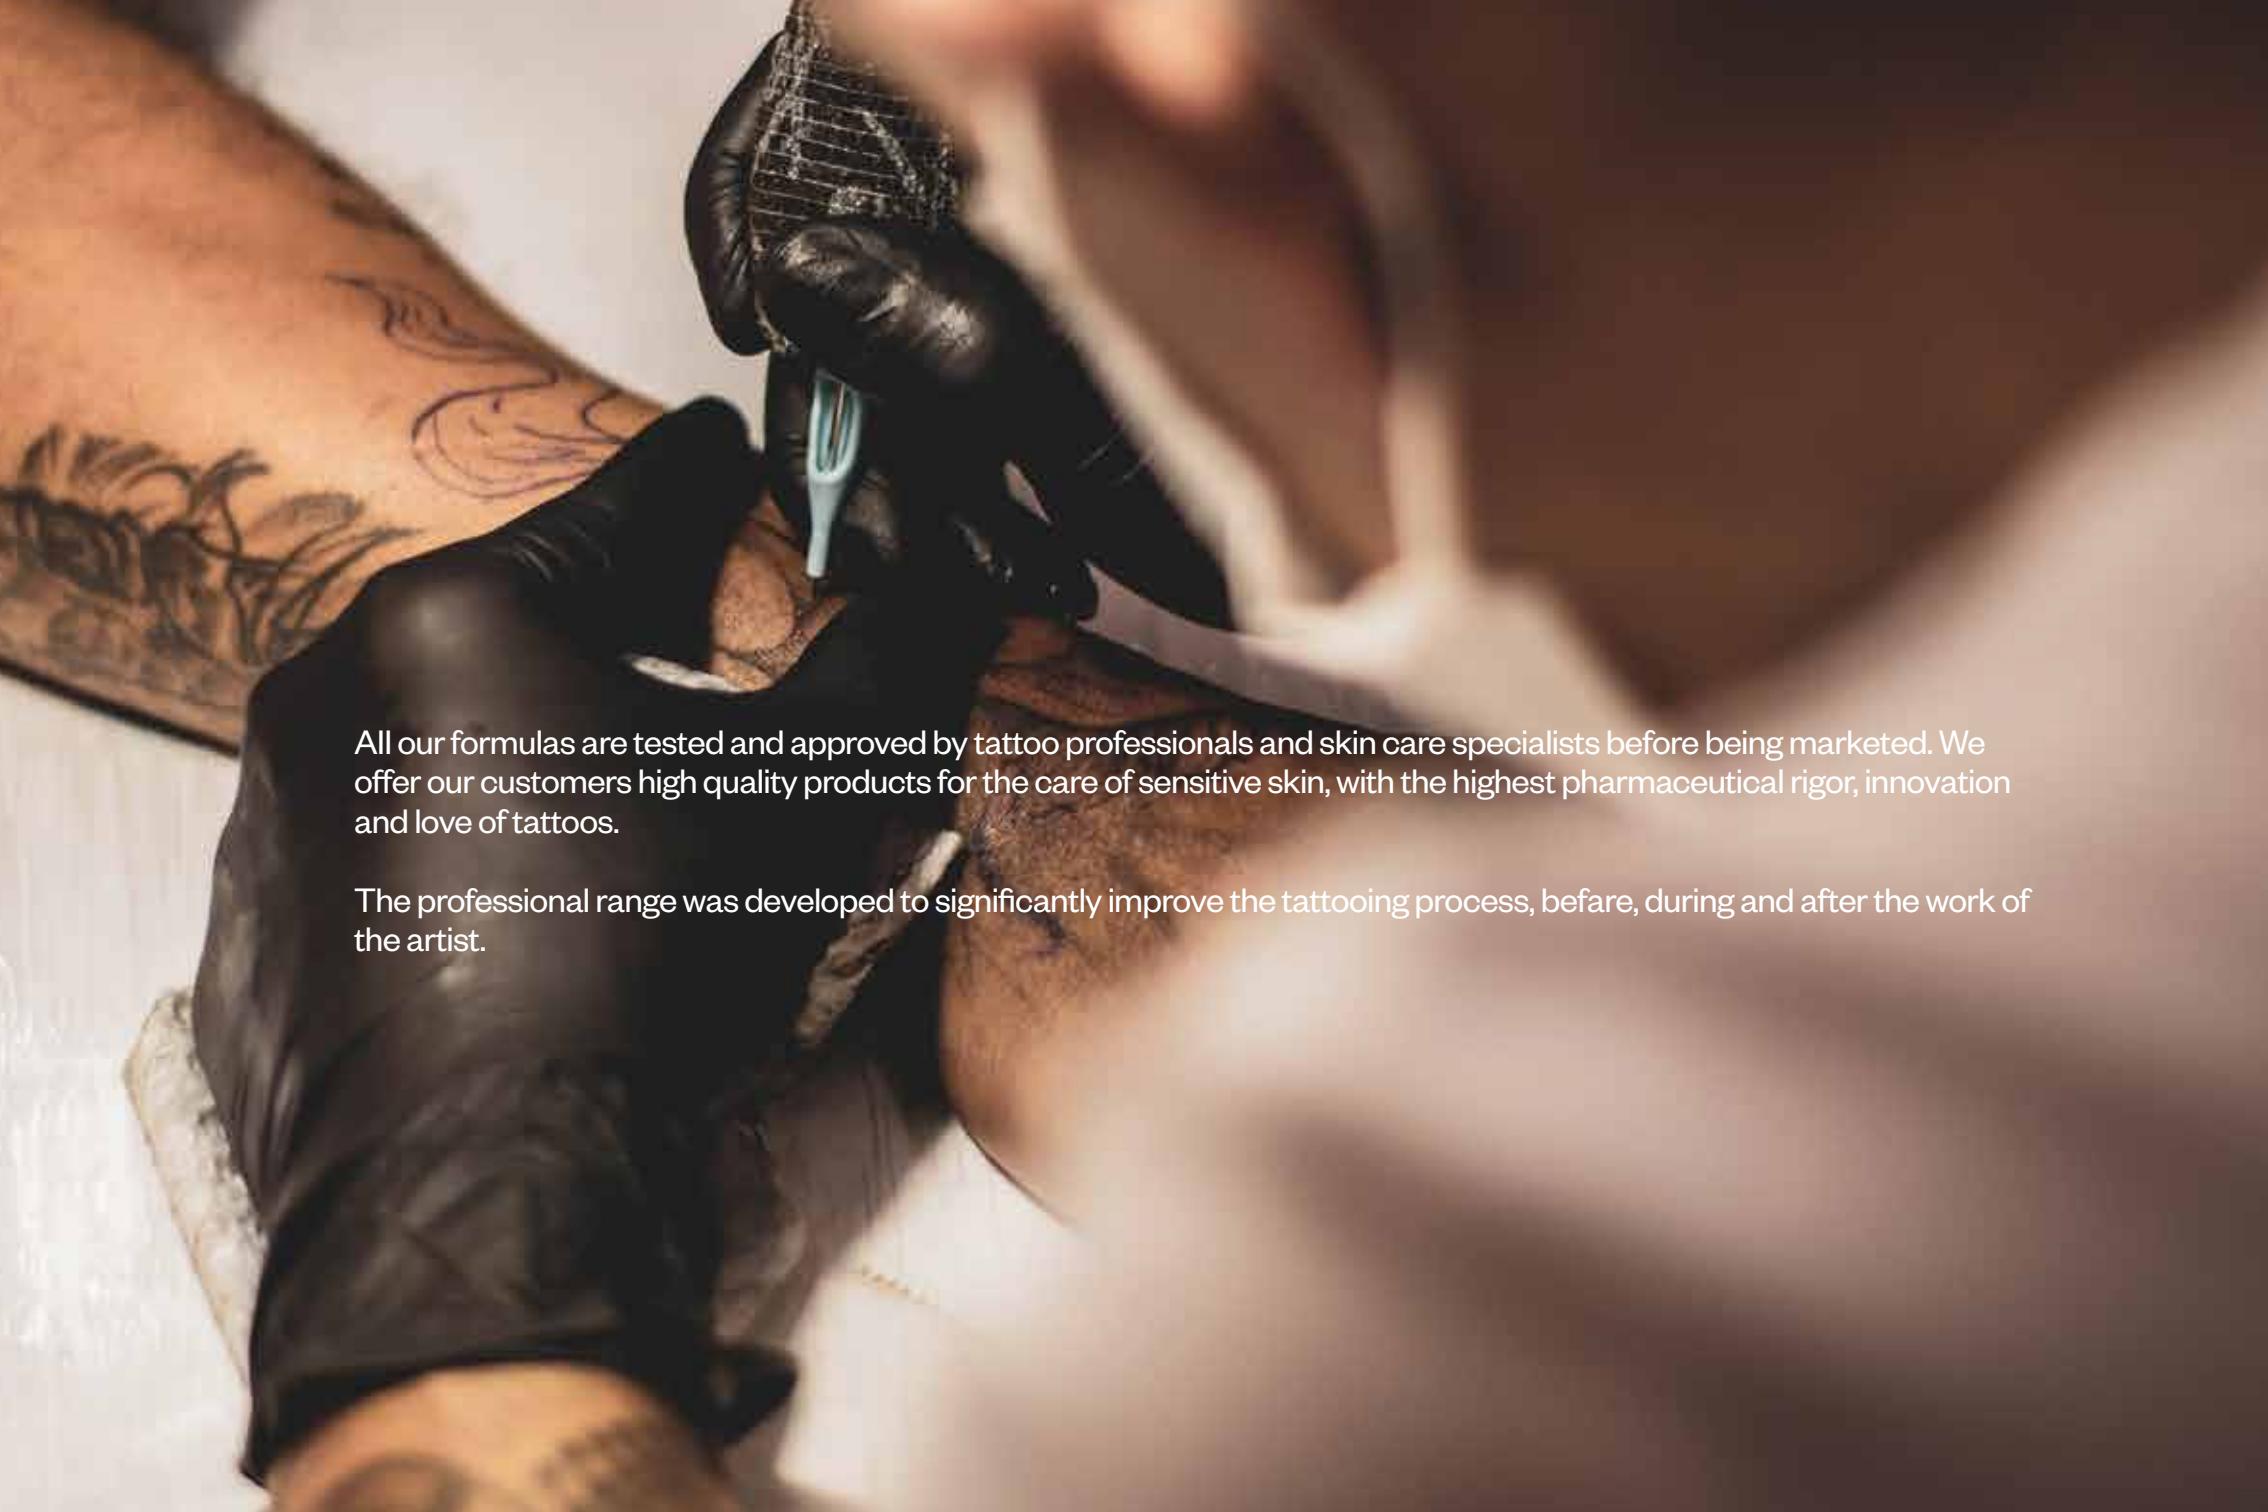

A portrait of a middle-aged man with short, light-colored hair, wearing black-rimmed glasses and a dark, short-sleeved button-down shirt. He has his arms crossed and is looking directly at the camera with a neutral expression. His forearms are heavily tattooed with colorful designs, including floral patterns, a large bird, and other intricate motifs. The background is a solid, dark color. The letters "US" are printed in a large, white, sans-serif font across the center of his chest.

US

DELAB CARE

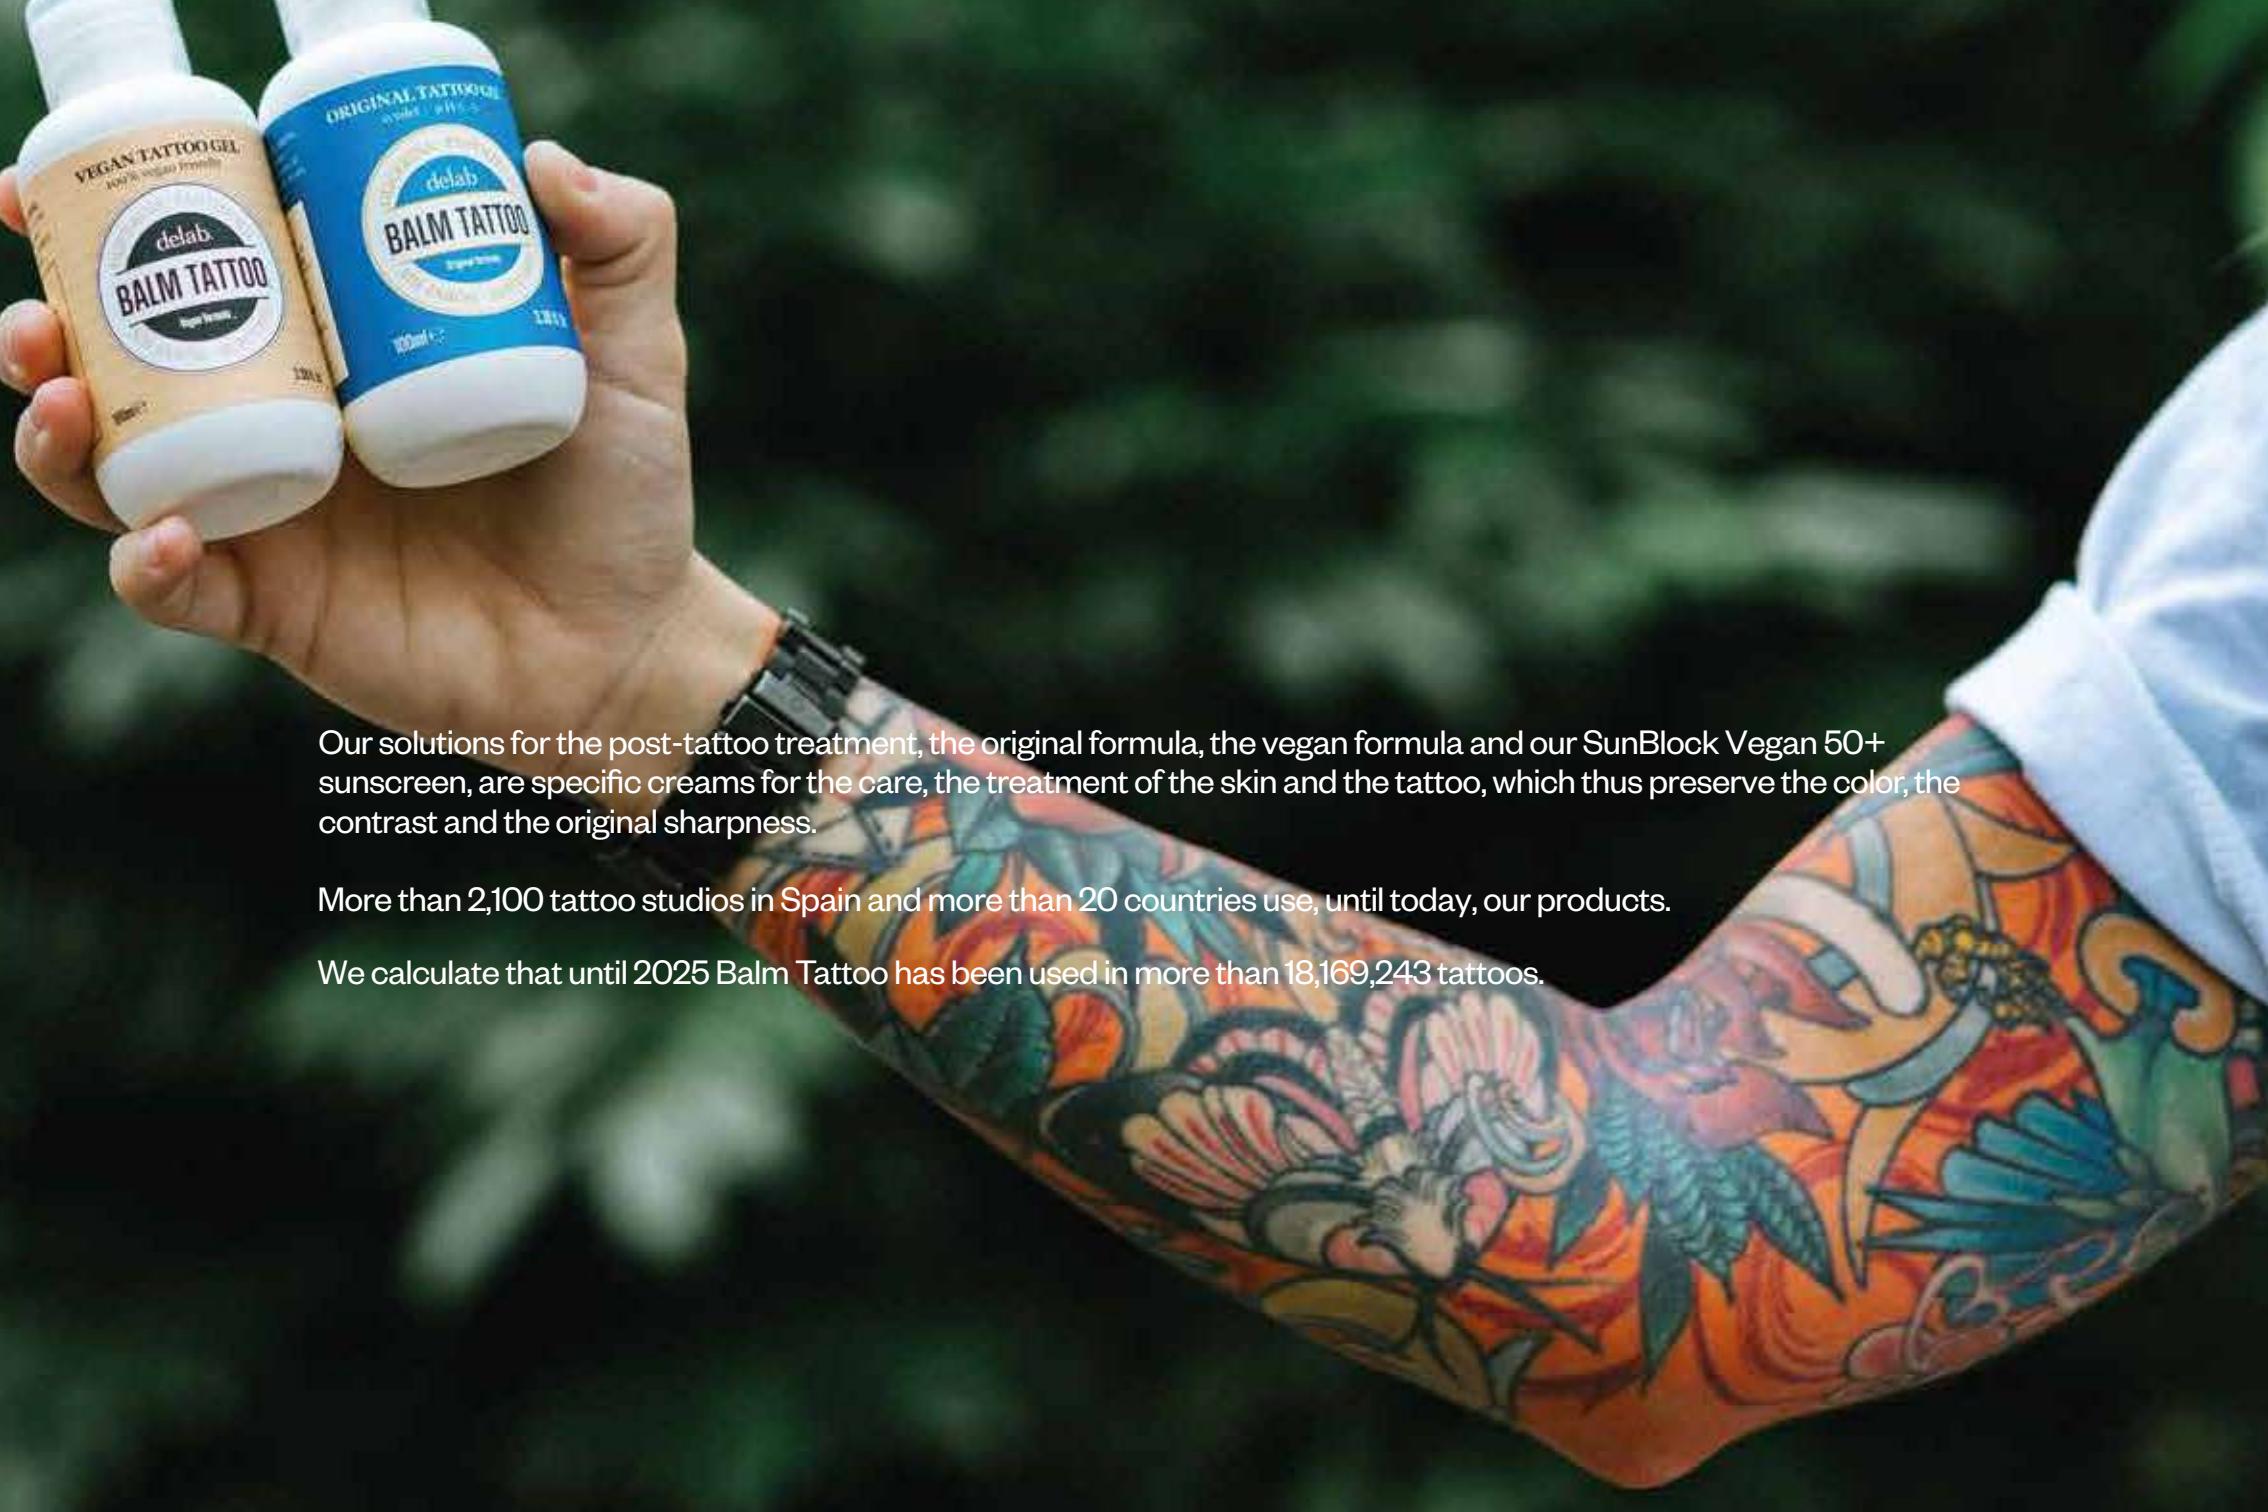

Is the brainchild of several generations of entrepreneurs and researchers, dedicated to the creation and development of pharmaceutical products, preventive medicines and cosmetics, who decided to focus their attention on the world of tattooing, every day more demanding on all aspects.

In order to maintain this pioneering character in this new range of products, we have chosen the active ingredients and substances that guarantee the achievement of this difficult challenge, avoiding unnecessary risks and providing appropriate solutions.

All our formulas are tested and approved by tattoo professionals and skin care specialists before being marketed. We offer our customers high quality products for the care of sensitive skin, with the highest pharmaceutical rigor, innovation and love of tattoos.

The professional range was developed to significantly improve the tattooing process, before, during and after the work of the artist.

Our solutions for the post-tattoo treatment, the original formula, the vegan formula and our SunBlock Vegan 50+ sunscreen, are specific creams for the care, the treatment of the skin and the tattoo, which thus preserve the color, the contrast and the original sharpness.

More than 2,100 tattoo studios in Spain and more than 20 countries use, until today, our products.

We calculate that until 2025 Balm Tattoo has been used in more than 18,169,243 tattoos.
